STATE OF CALIFORNIA  
STATE WATER RESOURCES CONTROL BOARD  
**DIVISION OF WATER RIGHTS**

**ORDER**

APPLICATION 1322

PERMIT 890

LICENSE 311

**ORDER ALLOWING CHANGE IN THE PLACE OF USE,  
CORRECT THE DESCRIPTION OF THE POINT OF DIVERSION  
AND AMEND THE LICENSE**

**WHEREAS:**

1. License 311 was issued to G. H. and Mildred S. Winton and was filed with the County Recorder of Merced County on November 27, 1925.
2. License 311 was subsequently assigned to Joseph E. Gallo.
3. A petition for change in the place of use has been filed with the State Water Resources Control Board and said Board has determined that good cause for such change has been shown.
4. The Board has determined that the petitioned change does not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.
5. An inspection of the project was made on November 13, 1989 and it was determined that the description of the point of diversion should be corrected to conform with the Board's regulations.
6. The license condition pertaining to the Board's continuing authority should be revised to conform with Section 780(a), Title 23, of the California Code of Regulations.

**NOW, THEREFORE, IT IS ORDERED THAT:**

1. The place of use under this license shall be as follows:  
40 acres within NW $\frac{1}{4}$  of NE $\frac{1}{4}$  of Section 27, T6S, R11E, MDB&M, being within SW $\frac{1}{4}$  of NE $\frac{1}{4}$  of said Section 27.
2. The points of diversion under this license shall be as follows:  
North 2,437 feet and East 3,032 feet from SW corner of Section 22, T6S, R11E, MDB&M, being within the NW $\frac{1}{4}$  of SE $\frac{1}{4}$  of said Section 22. It is also described by California Coordinate System, Zone 3, N 326,300 and E 1,927,900.

2. The license condition pertaining to the Board's continuing authority be amended to read:

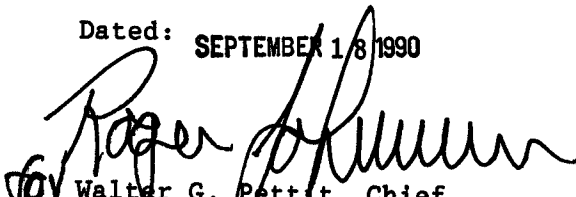

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
